Professional Summary

Frontend Developer with 1+ year of hands-on experience building scalable, production-ready web applications using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS. Shipped a full-featured e-commerce platform (42+ products across 10 categories) with live filtering, cart, and quote workflows. Proven ability to deliver pixel-perfect, mobile-first UI with reusable component architecture, REST API integration, and cross-browser compatibility, following modern Agile development practices.

Experience

Frontend Developer (Freelance)

Apr 2026 – Present

Vyomanexgen

- Built and shipped **CFOUR**, a production-ready e-commerce platform hosting **42+ products across 10 categories** (Pipes, Lights, Switches, Wires, MCBs & DBs, Plumbing, Accessories, Agriculture, Industrial, Drainage), using React.js and Tailwind CSS.
- Developed a dynamic product catalog with real-time **filtering and sorting** (price range, brand, colour, availability) and live stock-state handling (in stock, out of stock, unavailable).
- Built reusable product-card components displaying **star ratings and review counts (40–128 reviews per product)** and live discount pricing (up to 29% off), improving purchase-decision clarity.
- Implemented dual purchase flows — **Add to Cart** and **Add to Quote** — plus detailed product pages (size, material, product code variants), broadening checkout use cases.
- Designed a scalable component library (catalog, mega-menu navigation, cart, authentication) reused across **10+ category pages**, cutting new-feature development time.
- Delivered a fully responsive, mobile-first storefront ensuring seamless UX and cross-browser compatibility across devices.
- Owned the project end-to-end — architecture, component design, and deployment on Vercel — with self-driven code reviews to maintain production-level quality.

Frontend Developer Intern

Hyderabad

Skyinten Technologies Pvt. Ltd.

Nov 2025 - Feb 2026

- Developed responsive React.js interfaces for an EdTech platform serving courses, live classes, and hackathons, improving usability across student-facing pages.
- Converted Figma designs into pixel-perfect UI components for course listings and event pages while maintaining accessibility standards.
- Integrated REST APIs to dynamically render course content and event listings, enabling real-time data updates for students.
- Improved frontend performance and resolved cross-browser compatibility issues across course and event pages through debugging and optimization.
- Collaborated with the development team in Agile workflows to ship feature enhancements for course and event modules.

Education

CMR Engineering College

Nov 2021 – July 2025

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.68/10

Relevant Coursework: Web Technologies, Database Management Systems (DBMS), Operating Systems

Skills

- Frontend Development** : React.js, JavaScript (ES6+), DOM Manipulation, HTML5, CSS3, Tailwind CSS, Redux, Responsive Web Design
- UI Engineering** : Component-Based Architecture, Figma-to-Code, Mobile-First Design, Accessibility, SEO Best Practices, Pixel-Perfect UI Development
- Software Development** : REST API Integration, Object-Oriented Programming (OOP), SDLC Fundamentals, Frontend Debugging, Agile Development
- Tools & Technologies** : Git, GitHub, Vite, Vercel, VS Code, Chrome DevTools, SQL, Python (Basic)

Projects

JobX Portal | React.js, Tailwind CSS, JavaScript

[GitHub](#) | [Live](#)

- Built a centralized job aggregation platform enabling users to discover opportunities from multiple job portals through a single search interface.
- Developed responsive and reusable UI components using React.js and Tailwind CSS, ensuring a consistent user experience across devices.
- Implemented advanced search and filtering functionality to simplify job discovery and improve user engagement.
- Optimized frontend architecture, performance, and component reusability following modern React development practices.

Quiz Application | React.js, CSS

[GitHub](#) | [Live](#)

- Developed a dynamic quiz application using React.js with API-based question fetching, ensuring unique questions on every attempt.
- Implemented category and difficulty filtering, countdown timer, score tracking, and progress monitoring for an interactive user experience.
- Built reusable React components with conditional rendering for answer validation, result visualization, and quiz state management.

Personal Portfolio Website | React.js, CSS

[GitHub](#) | [Live](#)

- Designed and developed a fully responsive portfolio website showcasing projects, skills, and experience using React.js.
- Implemented dynamic navigation, reusable components, and responsive layouts for improved usability.
- Optimized frontend performance and ensured cross-browser compatibility.

Certifications

React JS – Core frontend concepts including component-based architecture, props, and hooks — [Scaler](#)

Java Programming - Covered Java basics: arrays, file handling, and structured data — [Coursera](#)

Virtual Technology Job Simulation – Software development experience — [Deloitte \(Forage\)](#)

Publications

Face Recognition-Based Attendance System Using KNN Algorithm

June 2025

IEEE 3rd International Conference on Augmented Intelligence and Sustainable Systems (ICAISS), 2025.

DOI : [10.1109/ICAISS61471.2025.11042050](https://doi.org/10.1109/ICAISS61471.2025.11042050)

Achievements

- **Certificate of Merit – Naukri Campus Young Turks 2025**
Secured 95.22 percentile in Naukri Campus Young Turks 2025, a national-level skill competition recognized by industry professionals.
- **Event Organizer – College-Level Events**
Coordinated college-level technical and cultural events, strengthening leadership and team collaboration skills.
